

## **Construction Update – East Montpelier VT 14 Bridge Project Week of 9/26/16**

Construction will continue on the VT 14 E Montpelier Bridge Project next week (September 26-31). The crew will set up a drill rig that will be used to install underground conduits for telecommunications equipment. Installation will be done by trenchless excavation, i.e. US 2 will not be dug up for the conduit. There is a possibility the conduit will be installed under US 2 which will require working one evening (6 P.M. TO 6 A.M.) next week. During that time US 2 will remain open, with one-way alternating traffic.

There will be lane closures throughout the week between 9 A.M. & 3 P.M. with alternating one-way traffic for moving equipment and materials; setting up barriers and saw cutting the US 2 pavement for an open cut to install pipe. The alternating traffic should be for short durations and will be done using flaggers.

Throughout construction the speed limit through E Montpelier village will be 25 mph.

**PLEASE DRIVE WITH CAUTION THROUGH THE WORK ZONE AND “HANDS FREE” IF USING A CELL PHONE.**
